PROFILE

I am a skilled Software Engineer at ARFA TECH Software House, mastering React.js, Next.js, and Node.js to craft intuitive, high-performance web applications. With over two years of frontend expertise and three months of hands-on experience in Node.js, I transform complex ideas into scalable, user-centric solutions. My passion for clean code and innovation fuels impactful projects in dynamic teams. I thrive on building technology that shapes the future.

SKILLS

Frontend Development

- React.js
- Next.js
- CSS3
- Tailwind CSS

UI Libraries

- Material UI
- Bootstrap
- JavaScript (ES6+)
- TypeScript

Version Control

- GitHub
- Git
- Figma (for UI/UX collaboration)
- npm
- Webpack

Responsive Design

- Media Queries
- Flexbox
- Grid Layout
- Mobile-First Design

PROFESSIONAL EXPERIENCE

Senior Frontend Developer

Feb 2025 – present | Islamabad, Pakistan

ARFA TECH

- Spearheading the development of scalable web applications, delivering seamless and intuitive user interfaces for diverse client projects.
- Leveraging React.js and Next.js to create responsive, high-performance applications with a focus on optimizing user experience.
- Implementing modern frontend practices, including component-based architecture and state management, to ensure code quality and maintainability.
- Collaborating with cross-functional teams to integrate APIs, enhance application functionality, and meet project deadlines.

Frontend Developer

Jan 2023 – Jan 2025 | Islambad, Pakistan

Dev For Health

- Leading the development of four healthcare projects, focusing on delivering high-quality and user-friendly interfaces.
- Utilizing React.js and Next.js to build responsive and efficient web applications tailored to healthcare needs.
- Implementing best practices in frontend development to enhance performance and maintainability of applications.

Intern

Sep 2022 – Dec 2022 | Rawalpindi, Pakistan

Tritechteal Technologies

- Assisted in the development of web applications using HTML, CSS, and JavaScript.
- Contributed to code reviews and collaborated with the development team.
- Implemented features based on client requirements and feedback.

PROJECTS

neuroEZ

"Neuroez" is a medical project aimed at enhancing healthcare solutions through innovative technologies. The project focuses on streamlining processes in the medical field to improve patient outcomes and healthcare efficiency

Silver Care

Facilitates the completion of various tests by patients through a web interface using MERN Stack

Ksa4sales

A fully developed KSA4Sale system, designed to be a competitor to OLX, built entirely by me using React.js, Node.js, and MongoDB (MERN STack).

Doing this together

Developed a scheduling system to manage patient appointments, including video and audio calls, as well as PDF medical records. Integrated data visualization features using graphs and charts to display patient information and historical test results. The system was built using React.js/Next.js for efficient front-end performance and seamless user experience.

EDUCATION

Abasyn University

Bachelor of Science in Software Engineering (BSSE)

2018 – 2022 | Islamabad, Pakistan
